To the House of Representatives

We request that the House of Representatives act to bring Ministry of Health and Ministry of Social Development eligibility criteria into line with current ACC entitlements, creating a needs-focused, non-discriminatory health delivery regardless of the cause.

IS OUR HEALTH SYSTEM FAIR?

New Zealanders with congenital conditions, intellectual disabilities, illnesses, and those having had an accident prior to 1974 receive significantly less funding than those covered by ACC. The Court of Appeal states 'Government can justify this discrimination under the Bill of Rights.' We believe this is completely unacceptable.

Please support our **petition**.
